India Meteorological Department
Regional Meteorological Centre, New Delhi
PRESS RELEASE (12th January' 17)

WEATHER OUTLOOK FOR NW INDIA
INCLUDING DELHI NCR FOR NEXT FIVE DAYS

Northwest India is under influence of cold wave conditions at few places and severe cold wave at isolated places especially over Haryana, Punjab, Delhi/NCR, Uttar Pradesh and North Rajasthan. The lowest temperature recorded was -01.9°C at Churu which is below normal by 6.8°C. Over Delhi and NCR, the lowest temperature was 2.0°C recorded at Lodi road and 3.4°C recorded at Safdarjung.

The cold wave conditions at few places and isolated severe cold wave conditions are likely to continue for the next 48 hours over Punjab, Haryana, U.P. and N-Rajasthan and abate thereafter.

A fresh Western disturbance is likely to affect western Himalayan region and adjoining plains of Northwest India from 14th. An induced system is likely to develop in association with the W.D. over central Pakistan and adjoining Rajasthan. Under the combined influence of these two systems:

- (a) Scattered to widespread snowfall/rainfall is likely to occur over J&K, H.P. and Uttarakhand from 14th to 16th January with peak intensity likely to occur on 15th night and 16th January morning in the region.
- (b) Isolated rainfall is likely to occur over west Rajasthan on 14th and on 15th January over north Rajasthan.
- (c) Scattered to fairly widespread rain is likely to occur over Punjab and northern parts of Haryana on 15th/16th January.
- (d) Isolated heavy snowfall/rainfall is also likely to occur over hills on 15th and 16th January.

Over Delhi NCR, the cold wave conditions are likely to abate from 14th. Dense fog is likely to occur in the morning on 14th at few places due to change in wind pattern. In association with W.D., cloudy sky will be prevailing from 14th to 16th January with likely hood of light rainfall over northern parts of Delhi NCR on 16th January morning.
